

Braids Brushing Machine BB-7025

- Demerge braids for various of small out diameter cables
- The machine is protected with a safety cover, which will not cause injury when using
- Only adjust the rotary speed and width when change wire
- The machine is very excellent in structure, can be improved as per customer's requirement
- Cable inlet sensor control
- Outside wire guide tube positioning

Braids Brushing

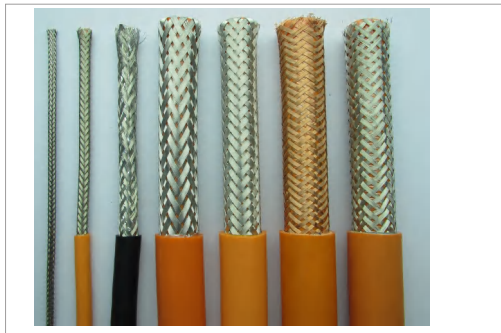

Braids Brushing Machine BB-7025

Application Area/Concept

BB-7025 is a braids & shields brushing machine, mainly used to demerge braids cable shields for multi-core wires, coaxial cables, etc. In the process of demerging braids & shields, the cables' own structure will not be damaged and its electrical properties will not be affected. This machine can demerge braids & shields's length up to 70mm, cables out diameter up to 25mm. It is suitable for demerge braids & shields of different sizes and densities. Especially, it's very important to demerge for the new energy automotive wire harness's braids & shieldings. The machine operation is simple and safe, easy to produce.

Properties

- Mainly used to demerge braids cable shields
- Cables out diameter up to 25mm
- Simple adjust the rotary speed, be suitable for different cable types
- Simple adjust the roller brush width, be suitable for different cable types
- Simple and quick for the interchangeable brush
- Used for batch production
- Operation is simple and safe, easy to produce.

After

Technical Specifications

Cable Diameter	Up to 25 mm
Braids Length	Up to 70 mm
Rotary Speed	Adjust
Rotary Speed Range	0~2000r/m
Width Adjust Range	0~25mm
Production Rate	350~400Pcs/hour (depend on wire braids and operator)
Round Brusher	Two
Drive Mode	Electric
Air Supply	No need
Power Supply	110/220 VAC , +/- 10%, 50-60 Hz; 350VA
Noise	< 75 dBA
Dimensions (LXWXH)	355x284x224 mm
Weight	14Kg
Important Notice	Chowho company recommends that wire samples be submitted in case where there is doubt as to the processing capabilities of a particular machine.
